## DETAILED ACTION

### *Double Patenting*

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

2. Claims 20-25 and 27-28, and 34-35 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1, 8-9, 10-14 of U.S. Patent No. 6,435,023, hereafter "023". Although the conflicting claims are not identical, they are not patentably distinct from each other and it would have been obvious for a skilled artisan at the time of the invention to modify the claims to reach to the claims of "023" because they are directed to the same invention with similar limitations as follows.

Regarding claim 20, "023" in claims 1, 8, 9, 11, 12, 14 of "023" teaches the scope the heating resistor type airflow rate meter.

Regarding Claim 21, "023" in claim 8, teaches the multiplication of a constant value for correcting the difference.

Application/Control Number: 10/634,782

Art Unit: 2855

Regarding claim 22, "023" in claim 9, teaches that the two heating resistors are placed at a closed positions.

Regarding claim 23, "023" in claim 10, teaches the similar placement for the output signal of the heating resistor.

Regarding claim 24, "023" in claim 11, teaches the use of two independent derive for each heating resistor.

Regarding claim 25, "023" in claim 12, teaches adjustment of the signals. Regarding claims 27 and 34, "023" in claim 13, teaches the use of a similar filter and adjusting/control means.

Regarding claims 28 and 35, "023" in claim 14, teaches a fuel injection control means and related correcting the difference value.

### ***Response to Amendment***

3. Applicant amendment and arguments filed on 1/31/05 have been fully considered and the rejection of claims over the paragraphs of 35 U.S.C. 102 is withdrawn, as a result claims 26 and 29-33 are allowed. The argument regarding double patenting however, is not persuasive, since this is clear case of obvious double panting. Mostly, it appears that applicant is improperly (without a terminal disclaimed) trying to broaden the scope of the same claims presented in "023" as shown above.

4. THIS ACTION IS MADE FINAL. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for response to this final action is set to expire THREE MONTHS from the date of this action. In the event a first response is filed within TWO

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event will the statutory period for response expire later than SIX MONTHS from the date of this final action.
